Socially Aware Mobility Laboratory

The Socially Aware Mobility Laboratory, within the school of Industrial and Systems Engineering at Georgia Tech, investigates novel mobility systems and the artificial intelligence and operations research technologies to power them. It focuses on sustainable mobility systems, optimizing for accessibility, convenience, and costs.

[Pascal Van Hentenryck](#) discusses the SAM lab which is "dedicated to solving the "first/last mile" problem, traffic congestion, and fostering sustainability."

Panel - "From Mobility Data to Mobility Systems" - Evangeline George, Allie Kelly, David Liniado, Pascal Van Hentenryck, Jacob Tzegaegbe, and Debra Lam

Thank You to Our GA Smart Partners!

We believe all communities can be smart. Through the integration of technology and data, communities of various sizes, geographies, and development can be empowered to improve their quality of life. That is why we have pulled together a cross-sectoral partnership to raise awareness and knowledge, develop networks, and implement smart projects. This monthly newsletter is part of this greater effort!
