Georgia Tech Hosts Smart Cities Dialogue

When it comes to smart cities, it is one thing to develop the technology. It is quite another to ensure those technologies serve the wants and needs of residents. That was the premise of the recent Georgia Institute of Technology conference, *Smart Cities Dialogue: Building Inclusive Communities and Partnerships* . The two-day event held May 7-8 focused on inclusiveness and equity in smart city design.

We believe all communities can be smart. Through the integration of technology and data, communities of various sizes, geographies, and development can be empowered to improve their quality of life. That is why we have pulled together a cross-sectoral partnership to raise awareness and knowledge, develop networks, and implement smart projects. This monthly newsletter is part of this greater effort!
